Samarth Goyal
Frontend Focused Full Stack WebDev

Enjoying the code aesthetics while being a design enthusiast is probably the best way to live a life. I enjoy converting static pixels to usable pieces of code that a person can spend time appreciating. I mainly code in NextJS and ReactJS. To not limit myself and leave any stone unturned I also learned how to work with server-side technologies and several databases.

WORK EXPERIENCE

Freelance Web Developer
checkstack.co 🔗

11/2023 - Present   *Remote*

Tasks:
- Responsible for all the frontend activities as a solo developer with use of many microservices and headlessUI's

Associate Consultant
Capgemini

09/2023 - Present   *Bangalore, Karnataka*
Promoted to Associate Consultant

Tasks:
- Working with TypeScript, NextJS and postgreSQL

Senior Analyst / Software Engineer
Capgemini

07/2022 - 08/2023   *Bangalore, Karnataka*

Tasks:
- Worked on ReactJS and postgreSQL as the tech stack.

PERSONAL PROJECTS

valoTAG
- Converting the Figma UI design files into pixel-perfect frontend code using TypeScript, NextJS and TailwindCSS.
- Handling the Backend and setting up the API calls using the NextJS App router and architecting the database with PrismaORM for serverless PostgreSQL with NeonDB.
- Using Strapi as the CMS for the news reporting feature of the website to render the markdown on the page.
- Using OFFICIAL RIOT API to populate the players data by various API calls who sign in using Riot's RSO (OAuth).

Reaction Time Microservice 🔗
- Made a Reaction Time Microservice as-an npm library with features to test and track the results through importable components.
- Used localStorage to store the data and recharts for the visualization of the same data to plot "All Test Results", "Best Test Scrore", and "Average Score".

Jagdish Bags (E-Commerce Website) 🔗
- E-Commerce website for a local Bags Manufacturing Firm.
- Built with TypeScript, NextJS and TailwindCSS and Redux-Persist with Redux-Toolkit for cart management through localStorage.

ZORO as SEO Agent 🔗
- Made a website for fictional character ZORO using NextJS, TailwindCSS, FramerMotion, postgreSQL, StrapiCMS. Cloudinary.
- The idea was to make a personal website for ZORO if he was an SEO agent with a feature of a customizable blog system.
- Used Strapi as the CMS & standalone-backend, NeonDB as the Cloud PostgreSQL DB, Cloudinary for Image Database.

SKILLS

TypeScript | NextJS | ReactJS | RTK | Redux
TailwindCSS | HeadlessUI | RadixUI | shadcnUI
SCSS | Vite | StrapiCMS | SanityCMS
recharts | nivo | postgreSQL | PrismaORM
MongoDB | NodeJS | ExpressJS | JavaScript

ACHIEVEMENTS

Crework Builders Cohort C4 (12/2023 - 01/2024)
Selected for Crework Builders Cohort C4 as a Frontend Dev

Recieved Riot API (09/2023 - Present)
Received Official Riot Games API for valoTAG

Capgemini Tech Challenge 2021 Edition (07/2021)
Regional Challenge Skill Category

Capgemini Tech Challenge 2021 Edition (07/2021)
ReactJS Category

CERTIFICATION

Meta Frontend Professional Certificate (10/2023 - Present)

EDUCATION

Bangalore Institute of Technology, Bangalore
B.Tech. - Electrical and Electronics Engineering

Delhi Public School, Agra
Schooling till 12th - PCM
